Restoring Endodontically Treated Teeth

[and other Restorative
Dilemmas]

Dr. Terry Donovan received his D.D.S. from the University of Alberta in 1967, and practiced full time in Regina, Saskatchewan for 13 years. He received his Certificate in Advanced Prosthodontics from the University of Southern California in 1981. He is currently Professor and Co-Director of the Advanced Education in Prosthodontics Program at USC. He has been Associate Dean for General Practice and Executive Associate Dean for Academic Affairs at the University of Southern California, as well as the Chairman of the Department of Restorative Dentistry from 1984 – 1991, and 1994-2001. He has published extensively, and has lectured world wide on the topics of restorative dentistry and materials science. He is a member of the ADA, CDA, Los Angeles Dental Society, CAIC, American Academy of Restorative Dentistry, the American College of Prosthodontists, a Fellow of the American College of Dentists, and an Honorary Life Member of the College of Dental Surgeons of Saskatchewan and the Western Canada Dental Society. He is past Chairman of the American Dental Association's Council on Dental Materials, Instruments, and Equipment.

Course Synopsis

Dr. Donovan will evaluate contemporary restorative materials in terms of their esthetic potential, longevity and technique sensitivity.

Criteria for materials selection will be given and techniques to provide optimum results will be presented in detail.

Topics to be discussed include:
The restoration of endodontically treated teeth.

Soft tissue management in fixed prosthodontics.

Metal-ceramic vs. all-ceramic crowns.

Gingival displacement, impression making and impression on materials.

Restorative options for posterior teeth.
