DIGITAL SCANNING, MEDICAL EMERGENCIES & PATIENT AND PRACTICE MANAGEMENT.

Dr. Neil Gajjar
Saturday
November 29, 2025
Delta Beausejour, Moncton, NB

Dr. David Isen
BSc., DDS

David was born and grew up in Toronto. He attended University of Toronto from 1983 to 1987 completing a Bachelor of Science degree in psychology and neuroscience. While completing this program, David worked in research at the university and co-wrote and published a research article on epilepsy. He then went to Western University studying dentistry. Following his graduation in 1991, David was lucky to

join a well-known, established practice in his old neighborhood. Years later, he still maintains private practice in the same suburban Toronto location.

After graduating from dental school, he received training in intravenous sedation at the Montefiore Medical Center in New York. Shortly after this, David received the status of Master of the College of Sedation in Dentistry from the American Dental Society of Anesthesiology. This, along with David's keen interest in behavior and psychology led him to focus his practice to treat people who require special care. People with needle phobia, strong gag reflexes, special medical issues, those who are difficult to get numb and dental anxiety are common traits of David's patients. As his reputation in this field has grown over the years, he has become a trusted source for patient referrals from other dental offices across Ontario to help treat these special patients. In over 25 years of practice, he has safely administered over 18,000 sedations.

Dr. Gajjar
BSc., DDS

Dr. Gajjar lectures on Managing Medical Emergencies in the Dental Office, Workplace Hazardous Materials Information System, the Business and Marketing of Dentistry, has been a lecturer of oral pathology and clinical instructor at the Canadian Academy of Dental Hygiene, and has served as a clinical instructor in the Oral Diagnosis and Emergency clinics at the University of Toronto, Faculty of Dentistry. Dr. Gajjar is a Master of the Academy of General Dentistry,

a Fellow of the Academy of Dentistry International, a Fellow of the Pierre Fauchard Academy, a Fellow of the International College of Dentists and a fellow of the American College of Dentists. He has served on the PLP committee, Disciplines Committee, QA Committee and as Councillor of the Royal College of Dental Surgeons of Ontario. He has served as the President of the Academy of General Dentistry, is a Clinical Examiner for the NDEB, and is certified in IV sedation.

Born in Stephenville, Newfoundland, Dr. Gajjar has been practicing in private practice in Mississauga for over 25 years and owns a single multidiscipline office employing a team of over 50.

Advanced Local Anaesthesia “What You Need To Know”

Over the past century, local anaesthetics and their delivery systems have evolved and improved significantly. Despite these advances, our ability to obtain profound numbness 100% of the time can be elusive, especially in the mandible. These situations can create painful dental visits for patients, creating anxiety for them and for the operator as well. This seminar will explore the reasons and remedies for incomplete local anaesthesia. A discussion about relevant nerve and bone anatomy and pharmacology that can lead to incomplete local anaesthesia will be presented. Techniques to supplement the standard inferior alveolar nerve block and armamentaria besides the standard needle and syringe will also be evaluated.

Some of the topics to be explored could include:

- Local anaesthetic offering techniques.
- Pain reduction ideas.
- The latest research about articaine.
- Local anaesthetic toxicity, allergy and drug interactions.
- Other injection approaches: intranasal; PDL; intraosseous; Gow-Gates block; and computer-controlled devices.
- Vasoconstrictor considerations for healthy and cardiac patients.

Dental Technology

This course will cover updates with what's new in dental technology focusing on scanning the dental patient. Hands-on use will be provided with **Digital DOC** cordless scanner device. Multiple units will be available.

The Business of Dentistry

This course will cover the business side of dentistry with a focus on some of the challenges facing the profession and possible solutions. Topics such as associates, contracts, equipment, staffing, training, marketing and managing patient expectations will be covered. This is a dynamic changing area and the most recent and long-term issues will be addressed.

Management of Dental Patients

This course will cover management of medical compromised patients in the dental office.

Medical Emergencies in the Dental Office

Dr. Gajjar will review the steps to follow when you encounter a emergencies in your office.
